

CHAPTER 80 THE NWSA DATABASE SYSTEM

80 – NWSA DATABASE SYSTEM

The NWSA Database Storage System is a national database, recognized by Agencies and administered by NWSA. It tracks firefighter, instructors, company training and certifications. Based on data in the system, NWSA issues Incident Qualification Cards to member Company employees on an annual basis. Only an NWSA recognized instructor can input data into the system.

Agency personnel may have limited access to verify training on an individual such as name, qualifications and employer.

To obtain login information, please contact Executive Director, Debbie Miley at:
1-877- 676-6927

80.1 Features of the NWSA Database Storage System

- a. Annually issue Incident Qualification Cards with photo, employee number, incident qualifications, additional skills, physical fitness rating, incident position needs and years of experience.
- b. Documented instructor qualifications and teaching history
- c. Documented firefighter records including qualifications, training, experience, position tasks books and fitness level
- d. All data entered by instructors, who are responsible for issuing Incident Qualification Cards
- e. All information is confidential

80.2 Fees

All data must be paid for when entering the Database Storage System. Fee schedule for 2020; refer to Page 30-4 of this manual or refer to Appendix B, page 4, Cost for entering data.

81. DATABASE TUTORIAL FOR INSTRUCTORS

A PDF Database Tutorial for instructors has been completed and is on the NWSA website, under Training Documents. A similar document is available in Appendix B of this manual.

To access the Tutorial, go to <http://www.nwsa.us> and login in with your instructor password. You will find the Tutorial on the information page. You can review it online or you can print it out. We will continue to work on it and make changes as issues come up.

We are currently working on a Tutorial for company owners and will post that to the website as soon as completed.

82. LEAD INSTRUCTOR COMPUTER SKILLS

Lead instructors must have sufficient experience with current technology to perform the duties of an instructor with regard to entering a class, printing documents, taking and uploading student photo's, scanning training certificates and Performance Task Books, entering physical fitness scores, certifying student's current qualifications, printing training certificates and Incident Qualification Cards with in the NWSA Data Base Storage System.

A class is considered entered when the instructor enters the class information into the NWSA Data Base Storage System, records all students as passed or failed and certifies that all requirements have been met to certify the student for a class or position.
